CERTIFICATE

This is to certify that the project report entitled
“TRAVEL MANAGEMENT SYSTEM”

SUBMITTED BY

Mr. RENAV KULKARNI

3301037

is a bona fide work carried out by him under the Guidance of Prof. V.S RAJPUT and it is approved for the partial fulfillment of the requirement of the University of Pune for the award of the THIRD YEAR ENGINEERING (INFORMATION TECHNOLOGY).

This project report has not been earlier submitted to any other institute of university for the award of any degree or diploma.

ACKNOWLEDGEMENT

We take this opportunity to express our heartfelt gratitude towards the people who have rendered valuable help to us in this project. We are thankful to our principal **Dr. S.N.Markande** sir for giving us lot of Facilities in the laboratory. We would like to thank **Dr. A.P.Adsul** (H.O.D) for his encouragement in this project. We would sincerely like to thank our project guide **Prof. V.S Rajput** for giving us this Path-breaking and wonderful idea .She guided us in a way that not only increased our knowledge but also increased our potential. Finally we express our honest and sincere feelings towards all those who helped directly or indirectly in many ways in our project work.

CHAPTER 1

INTRODUCTION

“Travel Management System” is a system designed to maintain database of Travel Management Site especially to deal with booking, updating and canceling of tickets by the admin and the customers. The system uses JAVA as frontend and MySQL as backend.

This management system application is developed for an organization which provides booking of tickets.

Customers can use this system so as to book their tickets or vehicle for travel booking instantly without going to travel agency and do their travel booking on a one click go. Thus, this system smartly reduces human efforts and time and efficiently solves real time problem of travel management.

Chapter 2

Abstract

The “**Travel Management System** ” application’s objective is to provide a system which manages the ticket booking activity in a travel management system. The users will consume less amount of time when compared to manual paper work through the automated system. The system will take care of all the sales servicing activity in a quick manner. Data storing is easier. It will be able to check any report at any time. Paper work and manual work is reduced. The system is user friendly and easy to use.

This system uses authentication so as to prevent unauthorized access to the database. This system provides service to the travel agency and customer.

The Travel Agency /Admin can do following tasks-

- Add Admin.

- View user booking information like:

Traveling city, Destination city, Email of user, Date of traveling, time of traveling, booking status and Vehicle of traveling.

& registration information like:

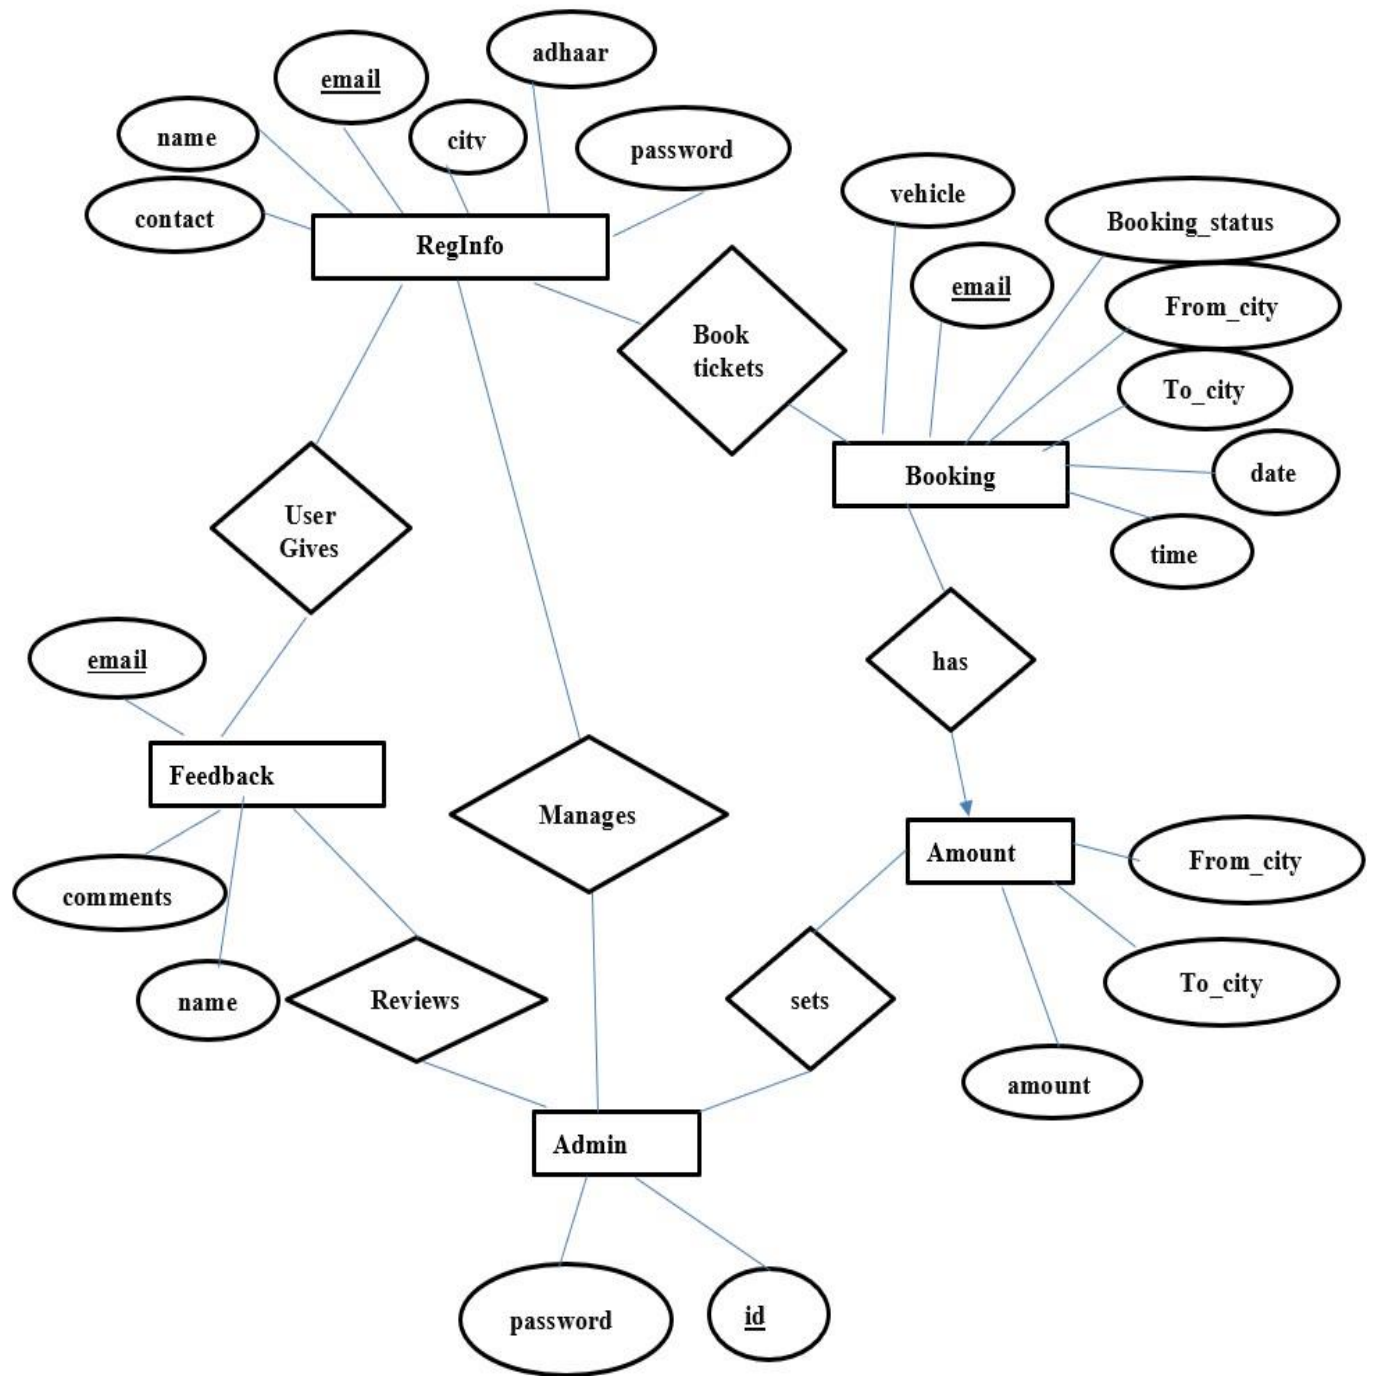

Name, Contact number, Adhar card Number, City, Password and Email of user/customer.

- Update booking status.
- Set amount for booking.
- Remove user.
- View feedback.

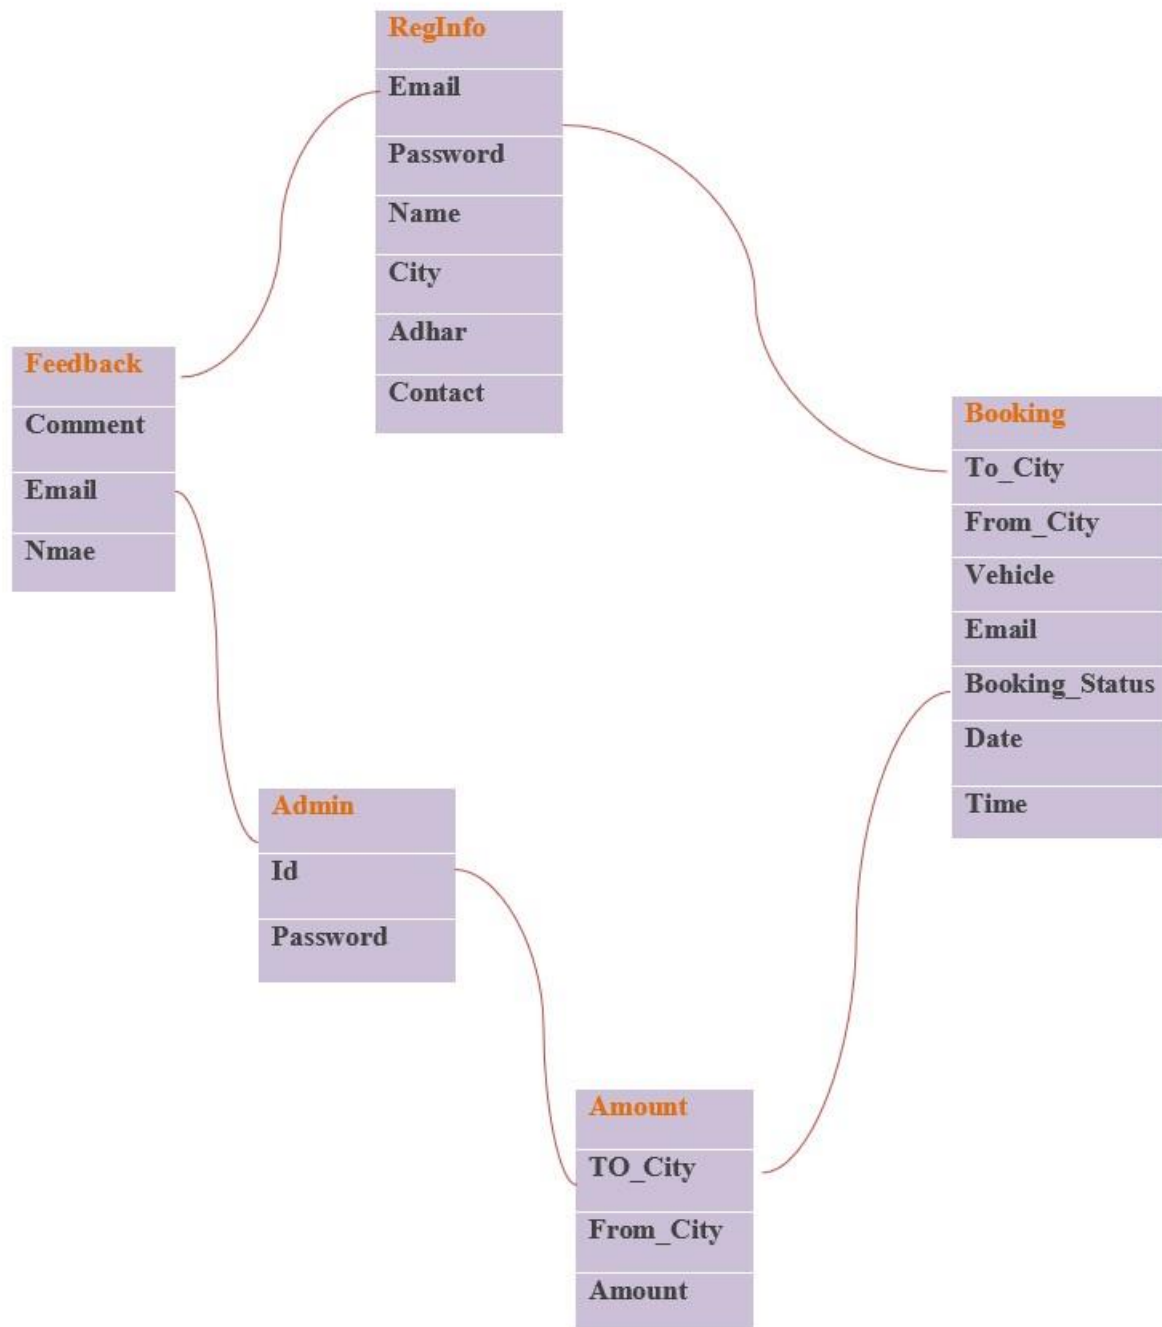

The Customer can do following tasks

- Book tickets.
- Check booking information.
- Update booking.
- Cancele booking.
- Give Feedback
- Contact Admin for query.

Chapter 3

Graphic User Interface

ADMIN SIDE:

1. Login Page

2.Admin Menu

Add Admin

The screenshot shows a web application window titled 'Add Admin'. It features a dark background with a light gray sidebar on the left. The main content area has a top right button labeled 'Admin home'. Below this, there are two input fields: 'New Admin ID' and 'New Admin Password'. A light gray button labeled 'Add Admin' is positioned below the password field. In the bottom right corner, there is a logo consisting of a stylized flame or smoke rising from a base.

View Registration & Booking Information

The screenshot shows a web application window titled 'View Registration & Booking Information'. It features a dark background with a light gray sidebar on the left. The main content area has two buttons at the top: 'view register info' and 'view bookings'. Below these buttons is a table with two sections. The left section contains registration information, and the right section contains booking information. At the bottom right, there is a button labeled 'back to admin home' and a logo consisting of a stylized flame or smoke rising from a base.

Remove User & Booking

The screenshot shows a web application window with a dark background. It contains two main sections: 'Bookingng Delete' and 'Remove User Section'. The 'Bookingng Delete' section has an 'Email' input field and a 'Delete Customer Booking' button. The 'Remove User Section' has 'User Name' and 'User Email' input fields and a 'Remove User' button. To the right, there are two 'Note' sections. The first note states: 'Due To Some Issues You Want To delete Customer Booking Then just Enter Email Of The Customer'. The second note states: 'If You Want To Remove Any User Then'. Below the second note are two steps: 'Step 1' with the instruction '1) cancel their booking' and 'Step 2' with the instruction '2) then Remove from user'. A Java logo is visible on the right side of the interface.

Note:

Due To Some Issues You Want To delete Customer Booking Then just Enter Email Of The Customer

Note:

If You Want To Remove Any User Then

Step 1

1) cancel their booking

Step 2

2) then Remove from user

Booking Status

The screenshot shows a web application window with a dark background. It contains a 'Users email' input field, a 'From City' dropdown menu (set to 'Mumbai'), a 'To City' dropdown menu (set to 'Mumbai'), a 'Time' dropdown menu (set to '12 A.M'), a 'Status' dropdown menu (set to 'pending'), and an 'Amount' dropdown menu (set to '50 Rs'). There is a 'back to home' button at the top right. Below the input fields, there is a table with columns 'email', 'form city', 'to city', and 'time'. Below the table, there is a 'view booking' button. Below the button, there is a table with columns 'From City', 'To City', and 'Amount'. Below the table, there is a 'genrate amount' button. At the bottom, there is an 'update status' button. A Java logo is visible on the right side of the interface.

User/Customer

□ Welcome Page

□ Login Page

- **New User Registration**

A screenshot of a web browser window displaying a "Registration Form". The background of the form is a map of India with a person standing on it. The form fields are arranged vertically on the right side: "Name", "Contact No", "Email", "Adhar No", "City" (a dropdown menu with "Mumbai" selected), and "Password". Each field has a corresponding white input box. Below these fields is a large "Submit" button. At the bottom right, there is a small button labeled "welcome page".

- **User/Customer Home**

-
-
-

- Set traveling details:

A screenshot of a web application interface for setting traveling details. The background is a dark, textured image with a banner that says "EXPLORE". The form includes the following fields:

- From city: Mumbai (dropdown)
- To city: Mumbai (dropdown)
- Date: (text input with a calendar icon)
- Time: 12 A.M (dropdown)
- Vehicle: Car (dropdown)
- email: (text input)

At the bottom, there is a "Confirm your booking" button, a link "If you want to update your booking, click here", and an "update booking" button.

View bookings

A screenshot of a web application interface for viewing bookings. The background is a light gray. The form includes the following elements:

- Email: (text input)
- view booking: (button)
- Table with columns: from_city, to_city, date, time, vehicle, booking_status, amount
- Illustration of a person standing next to a car, with a city skyline and a location pin in the background.
- Back home: (button)

Chapter 5

Testing Document

1 . Login as an admin:

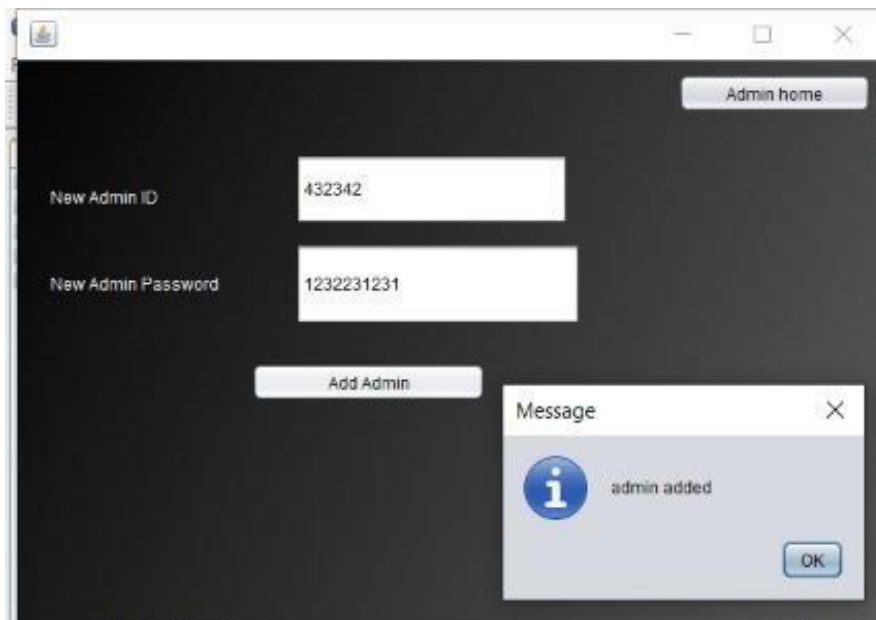

If AdminId and Password entered are correct then access is granted. Else access is Denied.

After Login as admin, you get a home page for admin where admin/agency can perform tasks such add admin, view registration bookings, remove user, update booking status, view feedback, set amount from one place to another.

2. **Add Admin:** Click on add new admin option to make a new admin we get "admin added" message if admin gets added.

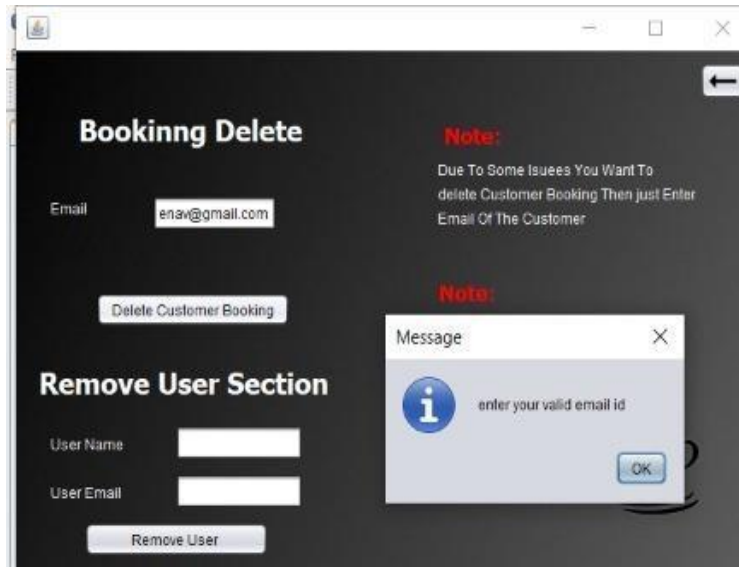

3.View Registration & booking info:

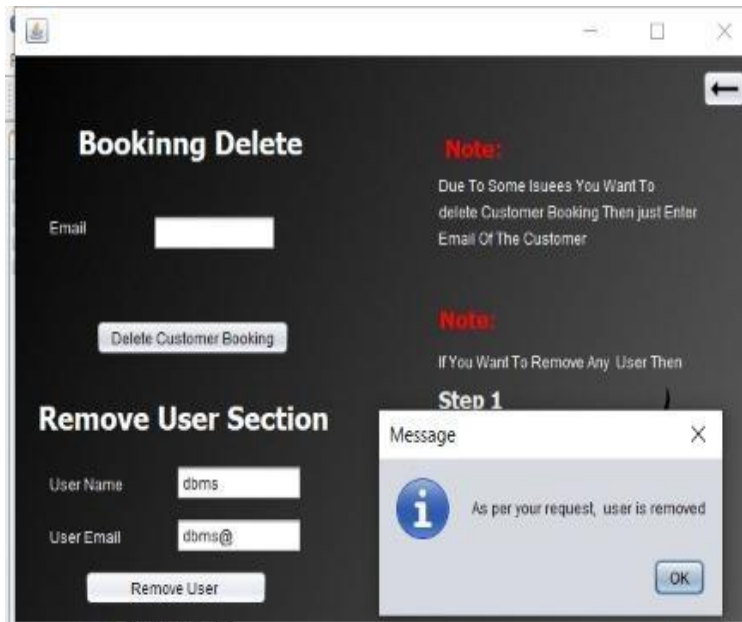

We can see registration and booking information:

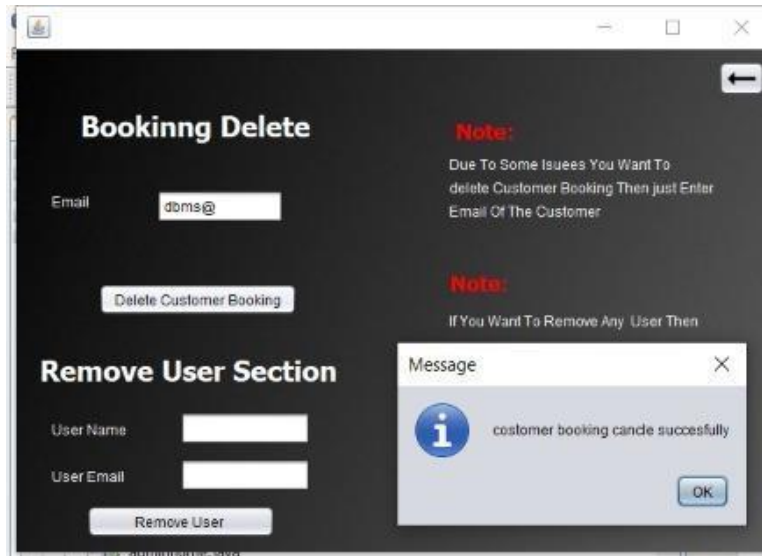

4.Remove User: In this we can remove user and also delete bookings of user If we enter wrong email id to delete booking we will get error as shown:

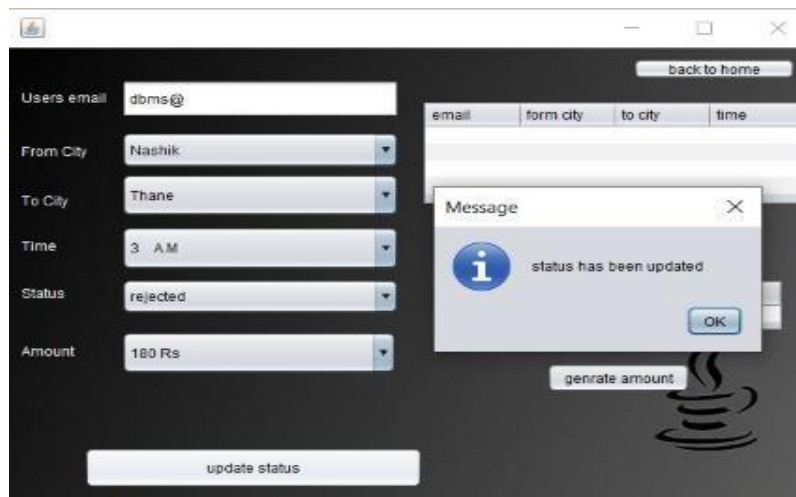

After we enter correct email we get following message:

After cancelling booking we get following message:

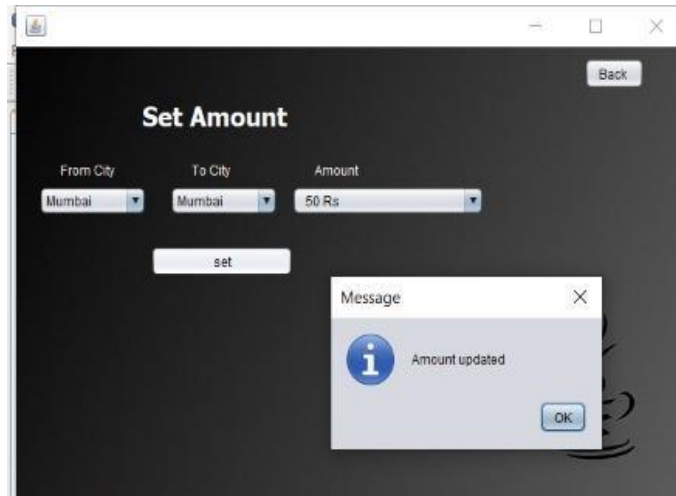

5.Booking status: In this we can update booking status to AA and then we can get message status has been updated:

6.Set Amount:

We can set amount through it

7. Logout:

On clicking this button Admin logs out from his account and comes back to login page.

8.Exit:

On clicking this button, we exit from entire program.

User Side:

Sign up for a new user.

user can create account by clicking sign up. The user must enter a unique username and password.

A screenshot of a web browser window displaying the 'Travel Management System' login page. The page has a teal background with a white airplane icon and a coiled cable. The title 'Travel Management System' is in red. There are input fields for 'Username' and 'Password', and a 'Log In' button. A link for 'Register Form' is provided for new users. A note at the bottom states: '* note:- Your User Name Is By default Your Name Which You Enter At The Time Of Registration'.

Password

Submit

User should enter valid email else the message will be displayed to user:

If user does not enter name error message will be displayed:

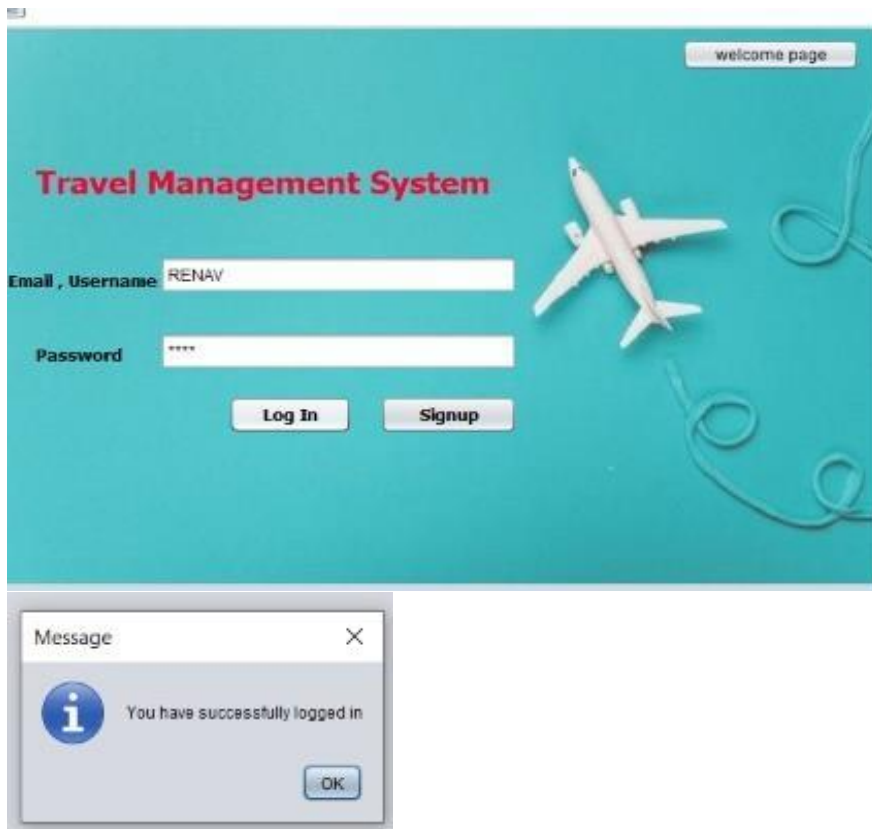

Thus after Successfully signing up, user can login into his account.

If the entered Username and password matches with username and password present in database then access is granted otherwise invalid credentials are printed on screen and access is denied.

If Username and password is correct “You have successfully logged in” message will be displayed
User is logged in his account. Following window is opened.

1. **Book Now:**

User can book tickets by entering data shown in figure:

From city: Mumbai

To city: Mumbai

Date:

Time: 12 A.M.

Vehicle: Car

email:

Conform your booking

If you want to update your booking click here

update booking

If you enter wrong email or empty email at time of booking message "Enter valid email" will be displayed.

From city: Nagpur

To city: Pune

Date: 13-04-2021

Time: 4 A.M.

Vehicle: PVT.Bus

email:

Conform your booking

If you want to update your booking click here

update booking

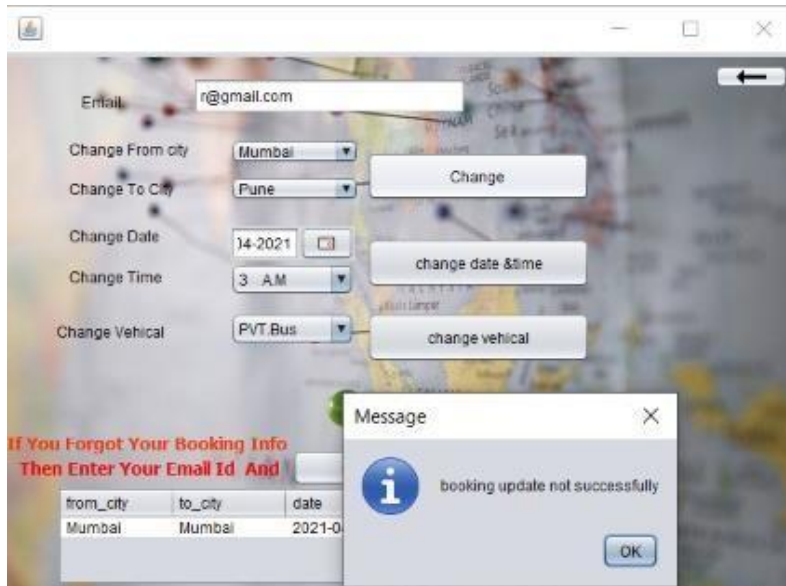

Teams

Message: Email is empty without email we can not confirmed your booking.

OK

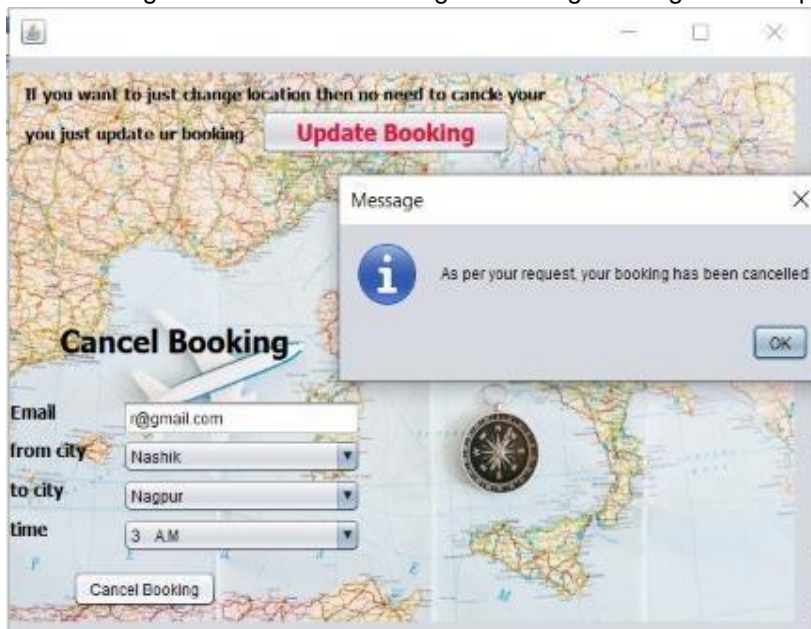

2. Update Booking:

In this we can update our booking we can change entire data or selective data of booking.

3. **Cancel Booking:**

In this we can send request to admin to cancel our booking after approval of admin the booking is removed from booking information of user we get following message after request of booking cancelled.

4. **Logout Button:**

Using logout button user can safely exit from his account.

Chapter 6 Conclusion

“Travel Management System” has been designed efficiently to deal with data storage and transactions involving Admin and customer for a travel agency. The system provides platform for client to book their tickets easily.

The future scope of the project involves:

- Development of web portal for system and making this application available on web and thus connecting to large number of customers online 24 X 7 and making business global.**
- Data Analysis and Understanding Business trends to maximize profits and reaching out to more customers.**
